# Loss Prevention

Loss prevention and insurance complement one another. As insurance transfers the impact of present and future risks away from our clients' business, loss prevention curtails these risks and the losses that they can generate.

Our clients understand the value that Generali Global Corporate and Commercial (GC&C) brings with its loss prevention service and therefore they consider Generali their loyal insurance partner. Since 1831.

Equipped with expertise in a wide array of industries and corporate risks, GC&C risk engineers are fully dedicated to our clients to help them solve any potential risks, avoiding or minimizing the negative economic consequences on their business or properties. GC&C risk engineers work closely together with underwriters, claims experts and client relationship managers to offer integrated solutions tailored to our clients' needs.

Countries

5000  
Plants evaluated  
each year

Loss Prevention  
Report

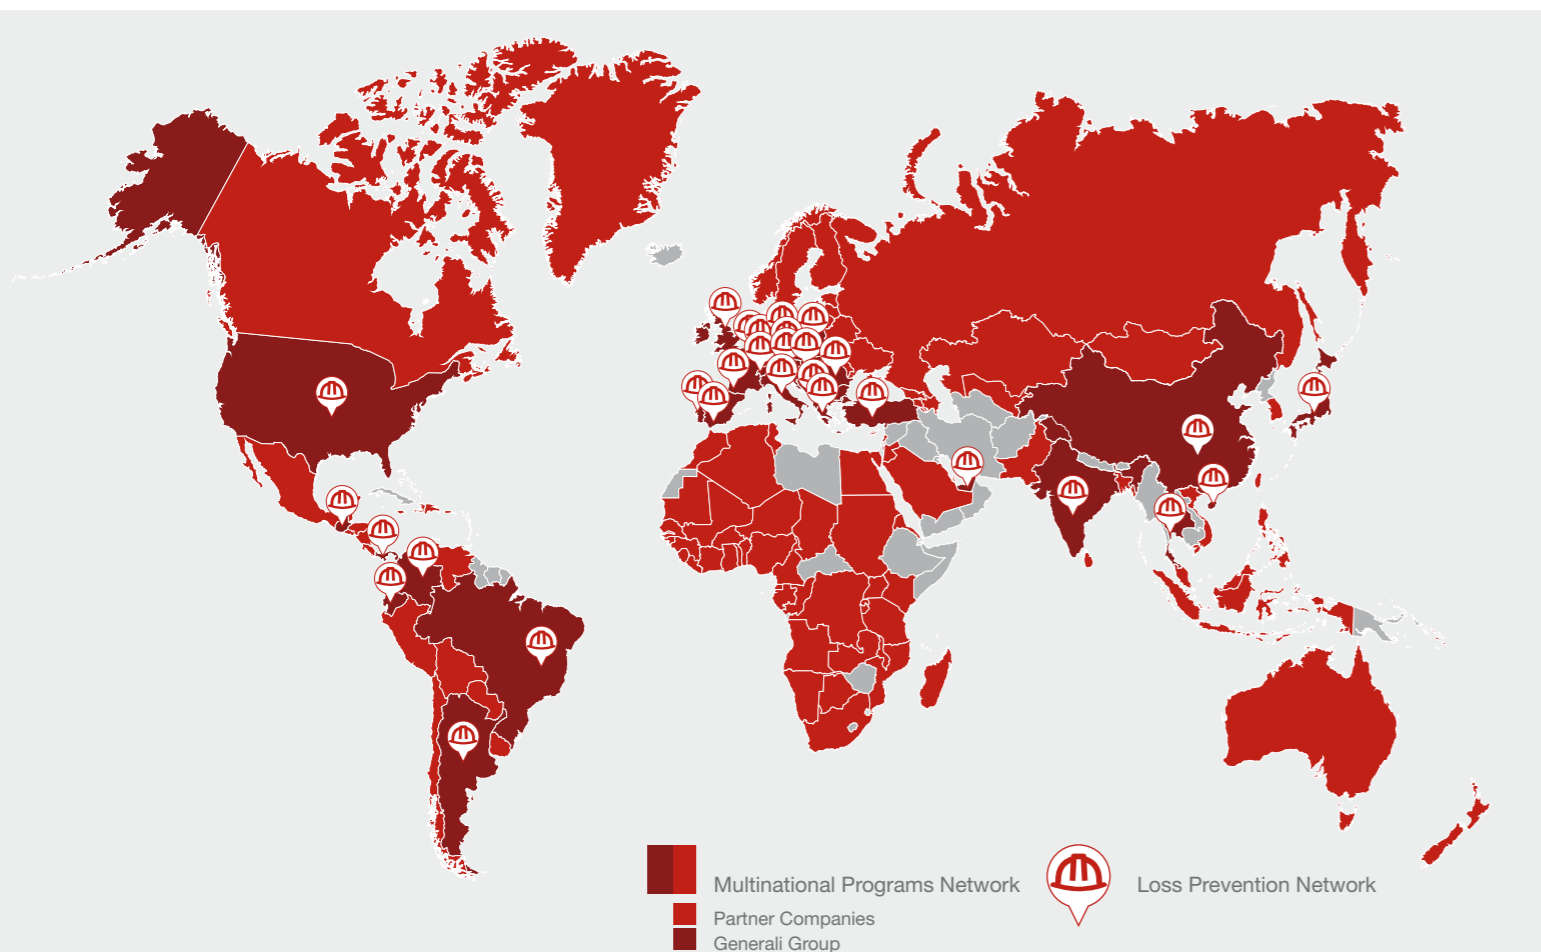

**Our clients are served by a global team of more than 100 risk engineers, located in 35 countries.**

We are organized in a worldwide network, spread throughout specific geographical areas that report to a central unit. Our risk engineers have gained extensive corporate and commercial knowledge that is further supplemented by specialized partners and consultants who address the most sophisticated needs of our clients.

Every year our professionals inspect and visit more than 5000 plants, implementing surveys and desktop assessments for our clients and brokers in every country of the world.

We provide physical, organizational and technical recommendations based on our risk inspections, surveys or desktop assessments. We consolidate and prioritize the recommendations in the GC&C Loss Prevention Report that is a risk management tool highly sought after by our clients as an operational guide to avoid and reduce their possible risks, often unknown or underestimated, and ultimately protect their business.

# Loss Prevention & Multinational Programs Network

Our risk engineers draw from their broad international experience to identify and recommend risk mitigation plans to our corporate partners and help them implement these plans in the most effective way. We have broad and reliable experience ser-

ving international risk portfolios across many different sectors, including manufacturing, construction and transportation. This experience allows us to develop tailor-made solutions to meet our clients' specific needs with a very flexible approach.

For each client, GC&C appoints a risk engineer who works alongside the client's organization with an attitude that reflects the Generali culture of reliability and flexibility. Our risk engineers approach our clients in a professional and personalized way, acting as enablers in the loss prevention process across several kinds of risk. Our services comply with the highest international standards and rely on advanced in-house management tools for the deepest corporate risk analysis.

The GC&C Risk Engineering & Loss Prevention Network is a key component of the integrated solution that Generali provides. It complements and reinforces the insurance solutions we provide our clients in the following areas:

- Property
- Engineering and Construction
- Third Party Liability, Product Liability and Recall
- Marine and Transport.

GC&C offers value-added integrated loss prevention services and solutions, also throughout selected professional providers, to meet the needs of our corporate and commercial clients:

**Loss Prevention Account Program Service:** dedicated account risk engineers support our clients to eliminate or to reduce their risk exposure, over time, through a systematic and customized loss prevention approach.

**Loss Prevention Multinational Network Service:** a prompt response to assess multinational risks is provided via a worldwide loss prevention network service.

**Risk Analysis & Loss Prevention Advanced Services:** pre-damage services, business impact analysis, disaster recovery plan and business continuity plan are the set of advanced risk management services we can offer our clients.

**Sum Insured Appraisal Service:** independent economic appraisal of clients' main assets to avoid possible underestimations in the policy and possible indemnification reductions in case of loss, speeding up claims settlement procedures.

**24 hour Claims Emergency & Decontamination Service:** management of loss emergency with decontamination and restoration experts in case of a major property claim to reduce its operational and financial impact and returning to the ordinary Company Client production activity as soon as possible.

**Loss Prevention Technical Advising CAR/EAR Service:** appropriate identification and measurement over time of the risks linked to a specific CAR/EAR Project and its execution.

**Loss Control & Reconstruction Program Service:** our risk engineers provide clients with highly technical support so they can better understand claims consequences. Loss Prevention Reconstruction Programs are developed to reduce loss probability and risk exposure in the future.

**Loss Prevention Corporate Security Service:** industry security management and assessment of the client's organization are available to support them for this relevant and often critical area.

**Crisis Management Service:** our risk engineers together with our Claims experts support clients to be prepared in facing a possible major crisis event before it occurs and to properly manage the crisis when occurring with a panel of customized solutions.
